CMUC Online Seminar on Algebra, Logic and Topology

University of Coimbra

On categorical conditions in the semi-abelian context.

James Gray

Stellenbosch University, South Africa

13 September 2022 (Tuesday), 15:00 (Lisbon time) · Zoom

Abstract

The purpose of this talk is three-fold. To give an overview of categorical conditions that hold for the categories of groups and Lie algebras. To explain how a single categorical condition gives rise to all of these conditions. To explain which implications do and do not hold between these conditions, as well as, point out where it is unknown.
