Categorical aspects of the non-abelian tensor product

Tim Van der Linden

UCLouvain, Belgium

25 May 2021 (Tuesday), 16:00 (Lisbon time) · Zoom

Abstract

We give an overview of joint work with Davide di Micco on an approach to the Brown-Loday non-abelian tensor product in the context of semi-abelian categories. We discuss the link with (internal) crossed squares and pairs of compatible actions, and present some examples and applications.
